

refri
twICE

ALWAYS COOL. ALWAYS GOOD.

Refri twICE is the brand new container for bottles that accumulates ice in a natural way and then gradually releases it so as to keep your beverages cold.

A UNIQUE PRODUCT

- ✓ Exclusive and ergonomic design, available in different colours and customizations.
- ✓ Efficient as it keeps the temperature constant for hours; it enhances the taste of food and drinks without altering it.
- ✓ Handy and user friendly; it doesn't require any maintenance.
- ✓ Ecological: as it doesn't use any water or ice to refrigerate it supports the protection of our planet's resources.
- ✓ Suitable for any context and environment: home, restaurant, bar, special events.
- ✓ Conceived, designed and made entirely in Italy, at an affordable price.

Two versions available:
Refri twICE S
refrigerates uninterruptedly
for 4 hours;
Refri twICE M
for 12 hours.

Made in Italy

is kept constant for **11,5 hours**
when the external temperature is of 20° • 23°C

A bottle of wine is brought
to the ideal tasting temperature (14° • 18°C) in **half an hour**

It facilitates white wine tasting.

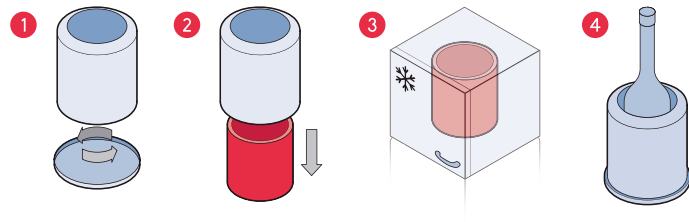

EASY TO USE

Refri twICE is made of a lower part that can be easily twisted off; once removed, it has to be kept in the freezer so that the natural liquid it contains reaches the desired temperature.

When using it for the first time it should be kept in the freezer for 24 hours for a better functioning.

After the first phase of ice storage, **Refri twICE** is ready to be used to keep food and beverages cold while preserving taste and quality.

Refri twICES e Refri twICE M can be used many times a day and recharging them takes as much time as the interval they spent at room temperature (as an instance, if you want to keep a bottle cold for three hours, you should keep the system in the freezer for three hours).

WARNINGS AND INSTRUCTIONS FOR USE

- **Refri twICES e Refri twICE M** are natural and ecological; the refrigerating natural liquid they contain is foodsafe, hence contact with people, animals or objects is completely harmless.
- Do not use dishwasher. If put under hot water for a long time, the refrigerating fluid loses permanently all its features and properties.
- High quality materials and a constant control of the manufacturing process make this product extremely resistant. Nonetheless, an accidental fall, especially when at low temperature, could damage it permanently.
